

# WORD MATE™

DATA PROCESSING'S PERFECT PARTNER.

Today's business world does not run on numbers alone. That's why Microdata now integrates word and data processing with WORDMATE™. The WORDMATE word processing system lets you put your data to use in letters, memos, reports and documents. And with WORDMATE, you use the same equipment that handles your data processing needs. The WORDMATE system handles complex data/text combinations with ease and makes straight-forward word processing amazingly simple. And there's no need for redundant equipment. Simply add the new PRISM® word processing terminal to instantly create a powerful WORDMATE workstation. Then, use your WORDMATE station to conduct any data processing task as well! Compare price, power and performance. We think you'll agree, the WORDMATE system is data processing's perfect partner.

# WORD MATE™

## from Microdata

Representation in 40 countries serving the United States of America, The United Kingdom, Europe, The Mediterranean, Africa, Latin America and The Pacific Regions.

### WORDMATE FEATURES

- The WORDMATE system lets any typist become a WORDMATE expert in a matter of hours. With easy to follow menus, self-help features and straight-forward mnemonic command structure.
- All command keys are at the operator's fingertips on expanded typewriter keyboard layout. No need to learn a complex keyboard.
- Text is always displayed in its proper format. No guessing how a document will look once it's printed. Status indicator and prompt line constantly keeps track of where you are.
- Automatic word wrapping, hyphenation notification during input, and automatic adjustment of text on insertion or deletion.

### Formatting

- Margin and tabs created via a visual "ruler" imbedded within text. Any number of "rulers" may be used within a document and may be saved for future use.
- Changes in margins or tabs dynamically reformat the document. A separate reformat procedure is not required.
- Five tab options: left, right, center, decimal and auto block indent.
- Variable line spacing.
- Automatic pagination and repagination.

- User selectable right margin justification.
- Automatic heading and footing capabilities with date, time, page number, and/or document name.
- Text highlighting options for emphasis or copy proofing.

### Editing

- Cut and paste text movement with 10 permanent storage locations.
- Forward and reverse search and replace on a global or stepped basis.
- One button character transposition and automatic case change on a letter or word basis.
- Full cursor control in edit mode with forward and reverse movement on a character, word, line, sentence, paragraph, page or document basis.

### Data/Text Integration

- Merge blocks of text from one document to another.
- Read prestored standard paragraphs, headings, and formats into document at output.
- File select capability with full power of ENGLISH® retrieval language.
- Repetitive letter generation with automatic insert of data fields. Variable text may be prompted for and entered by the user if data is not stored in the computer.

### Special Features

- Automatic formatting for memos and letters with chronological numbering. Sets up standard headings and permits retrieval by subject, author, date or recipient.
- Complete file maintenance and set-up utilities.

### WORDMATE WORKSTATION SPECIFICATIONS

#### Terminal

- PRISM video display terminal with special multifunction keyboard.
- 12 inch glare-free screen with full 80 column x 24 line display.
- Movable multifunction keyboard features color-coded command keys and integral numeric/cursor control keypad.

#### Letter Quality Printer

- Microprocessor controlled bidirectional printing.
- Interchangeable typefaces with 10, 12, or 15 characters per inch.
- Long-life cartridge-loaded ribbon available in nylon or multistrike carbon.
- Wide range of form handling capabilities including tractor, sheet, or friction feeds.
